# SCANNING THROUGH ADOBE ACROBAT DC

1. Open up Adobe Acrobat DC (it should be loaded on your Desktop).

2. With Acrobat DC open, click on "File" up at the top right corner.

3. Click on "Create" and to the right of that click

4. Choose the Scanner that is configured to your PC or Laptop. For scanning, make sure your settings are listed below:
    a. Sides: Front Sides or Both Sides.
    b. Color Mode: Black & White, unless you need Color on certain document(s).
   c. Resolution: 300 DPI
    d. Paper Size: Letter
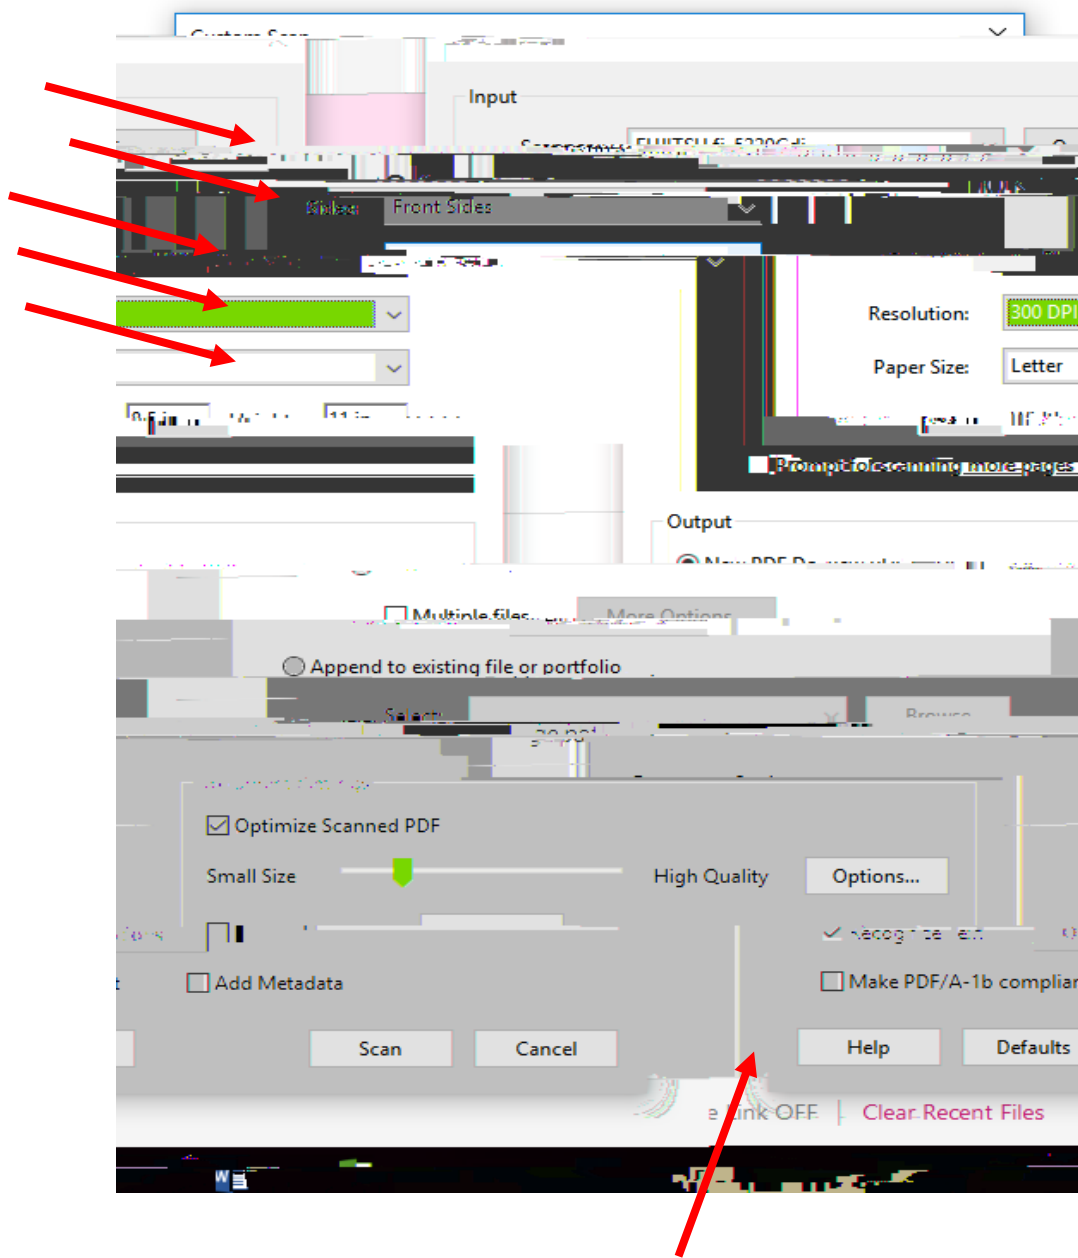

5. After choosing your scanner settings, click "Scan."

6. After Adobe finishes scanning, it will generate the page thumbnails, showing all the scanned document(s). You then have the option of deleting, inserting more document(s), moving documents(s) page(s) around, and rotating the document(s).
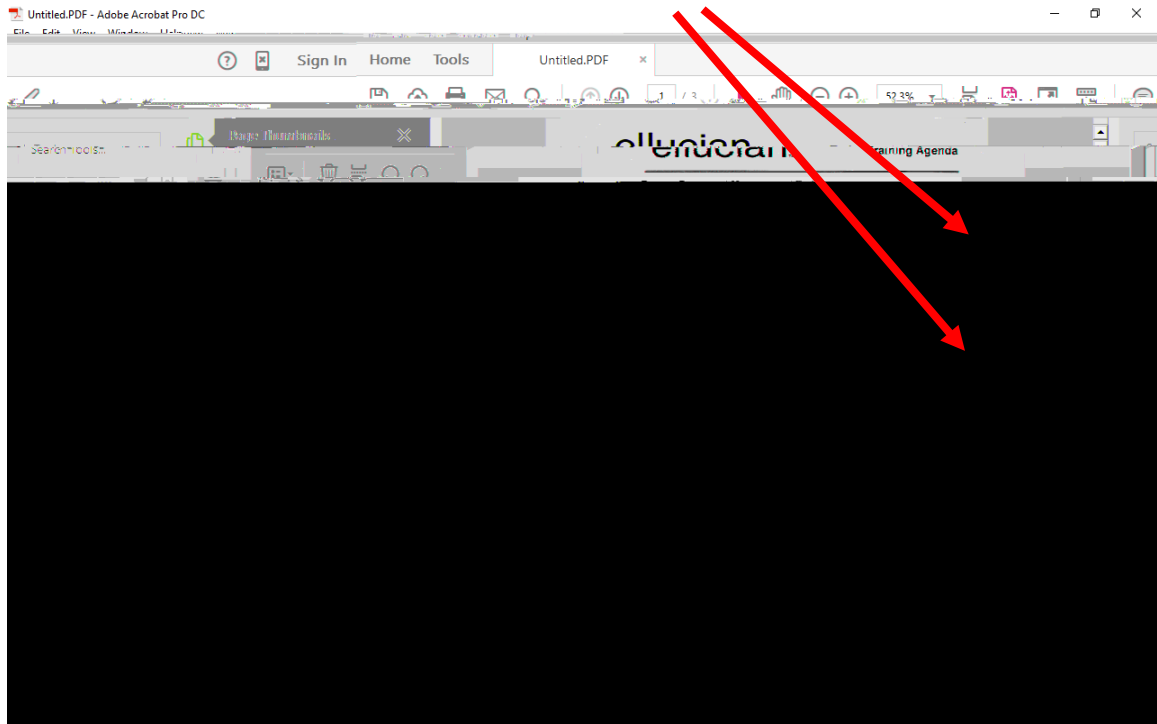

7. When you are satisfied with your scanned in document(s), click "File" and "Save As"
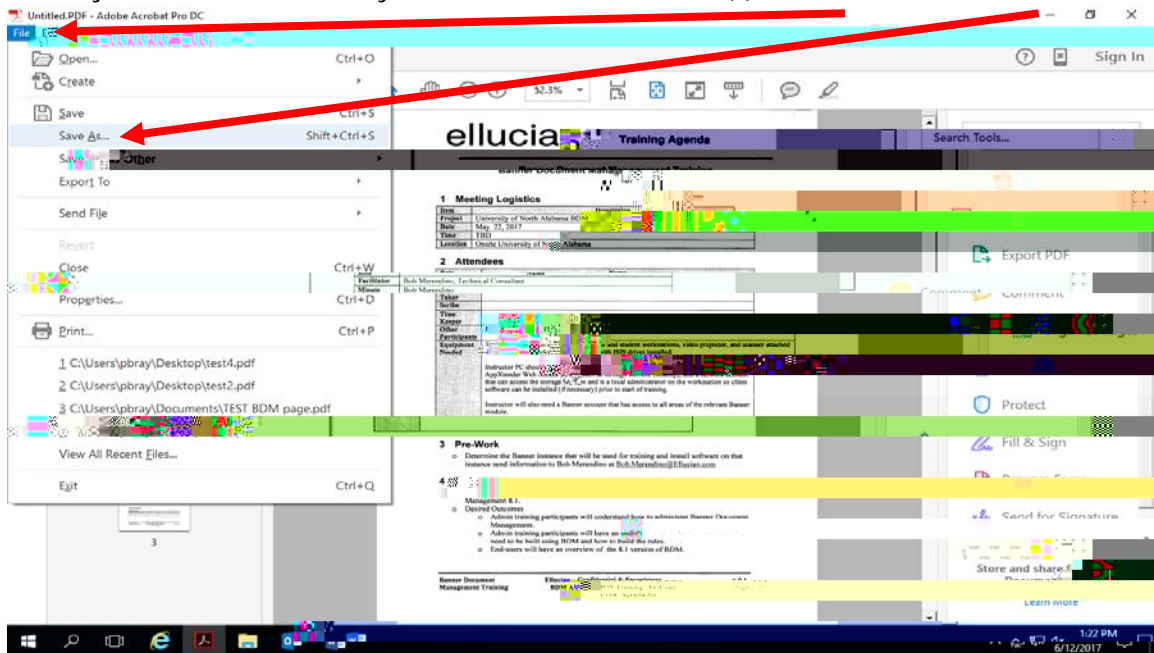

8. On "File Options" Click the checkbox "Reduce File Size". Then save the document to either your "Desktop" or "Documents" folder.
